

Case History

Drying expertise provides continuity of education

A national supermarket chain rang Rainbow International in Cardiff to call upon their expertise to carry out restoration of their hard floors in numerous stores.

Although these stores are cleaned regularly, soiling builds up on hard floors gradually. Deep cleaning will remove and restore the ingrained dirt and restore the floor, prolonging its lifespan and saving you the time, money and inconvenience of replacing a hard floor.

Rainbow attended the stores to survey each floor type and discuss with the site managers of each store when a convenient time to carry out the clean would be.

The nature of the deep clean and the health and safety constraints meant that the work was carried out after the stores had closed.

Rainbow carry out work 24/7 so we were able to fit in with the stores chosen hours.
