

## Case History

### 10 years of dirt!

A large medical centre in West Yorkshire contacted the Rainbow branch in Huddersfield requesting a quote for a specialist carpet and upholstery clean to be carried out at their facility. Upon a technician arriving on-site to scope out the work in order to provide an accurate quote, the medical centre informed him that the facilities carpets and upholstery had not been specially cleaned since the centre was built...10 years ago!

Upon supplying the quotation to the medical centre, this was duly accepted and Rainbow's specialist technicians got to work on the deep clean of the centre. Following the completion of this clean the medical centre were thrilled with the service they had received from Rainbow. This resulted in further work for the local PCT trust being requested; this included regular maintenance cleans of the carpets and upholstery, as well as being listed as the preferred company to be used for an emergency callout for bio-hazard cleans.

Rainbow International have over 25 years experience in carpet and upholstery cleaning and provide a 'sparkle' clean for all public & customer facing areas, supplying many industries with cleaning programmes during that time.

Grime, grease, dust and dirt can be removed leaving the premises hygienically clean, aesthetically pleasing and a comfortable, healthy environment for staff, visitor and patients.
